Midwest Generation is bringing new energy to the City of Chicago!

Our new generating stations will be a profitable source of energy, creating hundreds of jobs and revenue for the City of Chicago!

Fisk and Crawford, both generating stations situated in the industrial neighborhood of Pilsen are responsible for a great deal of the energy that keeps our country running! Energy sent to major cities like: New York, Cincinnati, Dallas, Columbus, etc.

The South Loop will become home to another great energy investment!
Midwest Generation is committed to success

Our success rests on the foundation of trust and confidence our consumers and communities place in Midwest Generation as we strive to meet growing demand for electricity in environmentally responsible ways.

Midwest Generation’s corporate strategy focuses on improving operating performance, strengthening financial performance, enhancing shareholder value, and ensuring a safe working environment for our employees. To achieve these goals, we are investing in our generation, transmission and distribution infrastructures to enhance reliability and expand our markets. Our new plant is a key part of this expansion. Our success in all key areas—cost-effective growth, environmental enhancements, commodity and risk management, and dependable delivery—make us a leading regional energy provider, recognized for operational excellence, customer service and a commitment to safety. Midwest Generation is

Our Workers Are the New Face of America

Midwest Generation is committed to diversity

Midwest Generation’s two existing Chicago generating stations are located in Latino neighborhoods and employ a diverse workforce. Our new plant will continue this commitment, creating jobs in construction, transportation and plant maintenance for a workforce as diverse as the great city we call home. The lot on which we are building our new plant will soon be bustling!

Midwest Generation is committed to clean energy

Since 2001, Midwest Generation employees have helped local Habitat for Humanity volunteers build more than 400 Energy Star-Certified homes. In 2001, Midwest Generation was named Cornerstone Partner of the Year at the Habitat for Humanity’s Ohio Statewide Conference in recognition of our significant contributions. In 2011, we plan to break ground on a state-of-the-art plant in Chicago. This plant will feature a green roof and fluidized bed combustion, a technology that minimizes sulfur emissions while ensuring abundant energy production. The energy from this plant will help ensure Chicago’s future as a sustainable city—one that creates the energy it consumes.
